

Color, Cut & Paste

Earth Day Bingo

Celebrate Earth Day by playing bingo!

Before playing, students get to create their own bingo cards! Students color their bingo squares, cut them out, and glue them onto their bingo card in whichever blank space they choose! (Challenge older students to design their own cards by brainstorming Earth Day items as a class. After brainstorming, allow students time to design their cards, drawing these items in each square in whichever order they prefer. Write each of these words on strips of paper, to be pulled and called during the game.)

No matter the way in which the cards are created, it presents the perfect opportunity to learn about Earth Day by discussing the items on the bingo cards!

Once the bingo cards are ready, it's time to play! The announcer cuts out their own bingo squares, but instead of gluing them onto a bingo card, they are placed in a bowl. The squares are randomly chosen and called. Students fill in their cards as their squares are announced. They raise their hand, declaring bingo, when they have a full row!

Earth Day Bingo Squares

Color the squares. Then, cut out the squares and glue them onto your bingo card.

 Recycle	 Earth	 Green	 Tree	 Water
 Plant	 Garden	 Flower	 Bee	 Worm
 Animals	 Plastic	 Metal	 Paper	 Organic
 Solar/Sun	 Clean	 Pollute	 Litter	 Ocean
