

The background is a vibrant collage of autumn-themed illustrations. It features large orange and red maple leaves, smaller blue leaves, and clusters of red and blue berries. Scattered throughout are small black dots and beige circles, creating a festive, seasonal atmosphere.

Leaf in Disguise

Bring some autumn fun into your classroom with the *Leaf in Disguise* challenge!

Each student receives a large leaf outline. Their mission? To disguise their leaf so it can't be recognized as just another leaf in the pile.

Encourage students to use their creativity and imagination! Will their leaf turn into a superhero, an animal, a famous person, a tasty food, or something completely out-of-this-world? The sky's the limit!

Let the students decorate the leaves and display them or add an extension to the activity—after students finish decorating, they will write a short story, poem, or explanation about their leaf's new identity.

Display the finished projects on a bulletin board or hallway wall for a festive, laughter-filled showcase of creativity!
