

Plug into the power of TeacherLists

At TeacherLists, what we do is simple – it's how we do it that's smarter. We've created a simple, all-in-one solution for all schools to manage and share their annual school supply lists.

FASTER

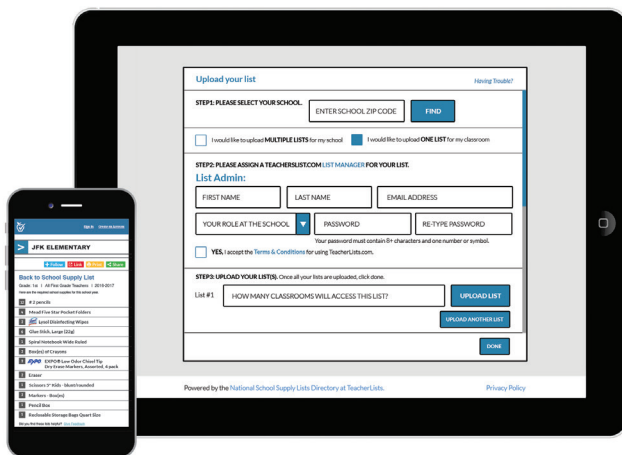

With just a click, you can upload your lists right to the TeacherLists system and they are instantly connected to your school, your parents and even to national retailers. No more printing, copying and hand delivering lists to parents.

SMARTER

Lists are immediately available to parents wherever they are – on their smart phones, on your website, on TeacherLists.com, even online and in-stores at major national retailers. It's the simple solution schools and parents have been waiting for.

MORE EFFICIENT

Your school staff will love you (and TeacherLists!). Effortlessly manage lists year to year with just a few clicks – no more hunting down lists, updating and reposting individual documents to your website, and sending them out to retailers and parents every summer. TeacherLists does it all for you – at no cost. We'll even remind you when it's time to update them!

Get started in a 2 simple steps!

1 Load your lists on TeacherLists.com

If you already have your lists on file, simply upload them using our online Power Loader (accepts most document formats) at www.teacherlists.com/powerloader.

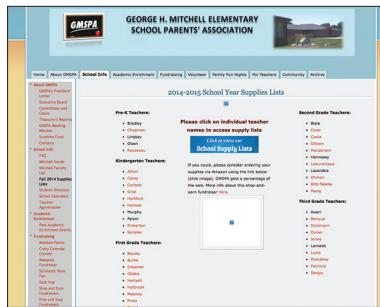

Or, you can easily create lists using our list wizard. Simply sign up for your free account to start building your online lists. If you're not sure where to start, we have grade level Quick Start List templates that include all items commonly requested by schools.

2 Add a link to your lists on your school's website

After you've loaded your lists, we'll email you the links (you can also get them by simply viewing your school or lists on TeacherLists.com). Adding your lists to your school website ensures parents always have access to your most current lists in a mobile-friendly format. Once your lists are active on TeacherLists, your lists will automatically update on your website, too – and you won't need your school webmaster to help. You can even choose how you'd like your lists to display. Learn more at www.teacherlists.com/how-it-works.

Link to an individual list

Link to all your school's lists

Display all your lists right within your website

Now that your school is plugged into the TeacherLists solution, it will be easier than ever to update and share your lists again next year. We're happy to act as your personal list assistant, too. Simply add us to your safe sender email list and we'll take of the rest. We'll send you links to your lists, notify you of cool new product features, and share special offers from our generous partners – from coupons and supply giveaways to big ticket sweepstakes. We'll even remind you when it's time to update your lists each year!
